

Installation & User Guide

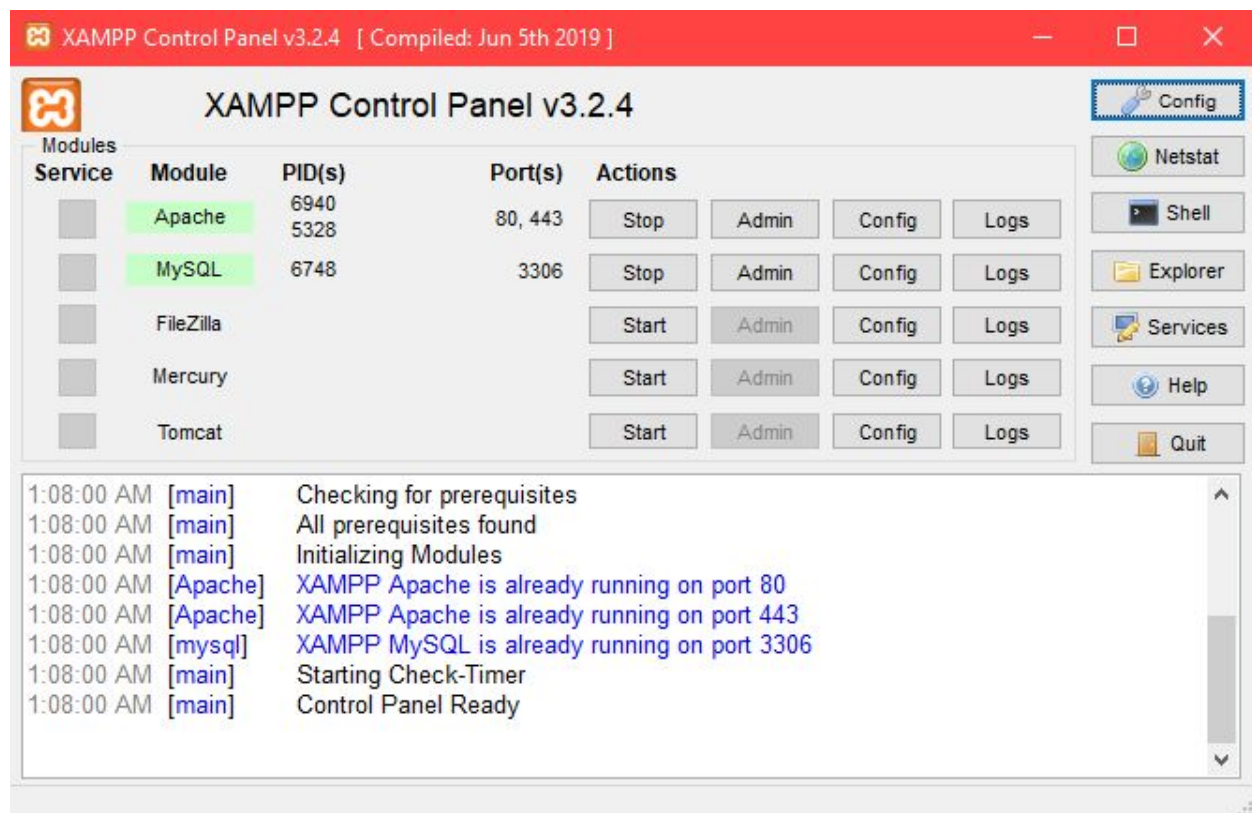

1 Install Environment

Install XAMPP or any other software that can create and run Apache server as well as MySQL database. We will use XAMPP for our test purpose. You can download XAMPP from this given url:

<https://www.apachefriends.org/download.html>

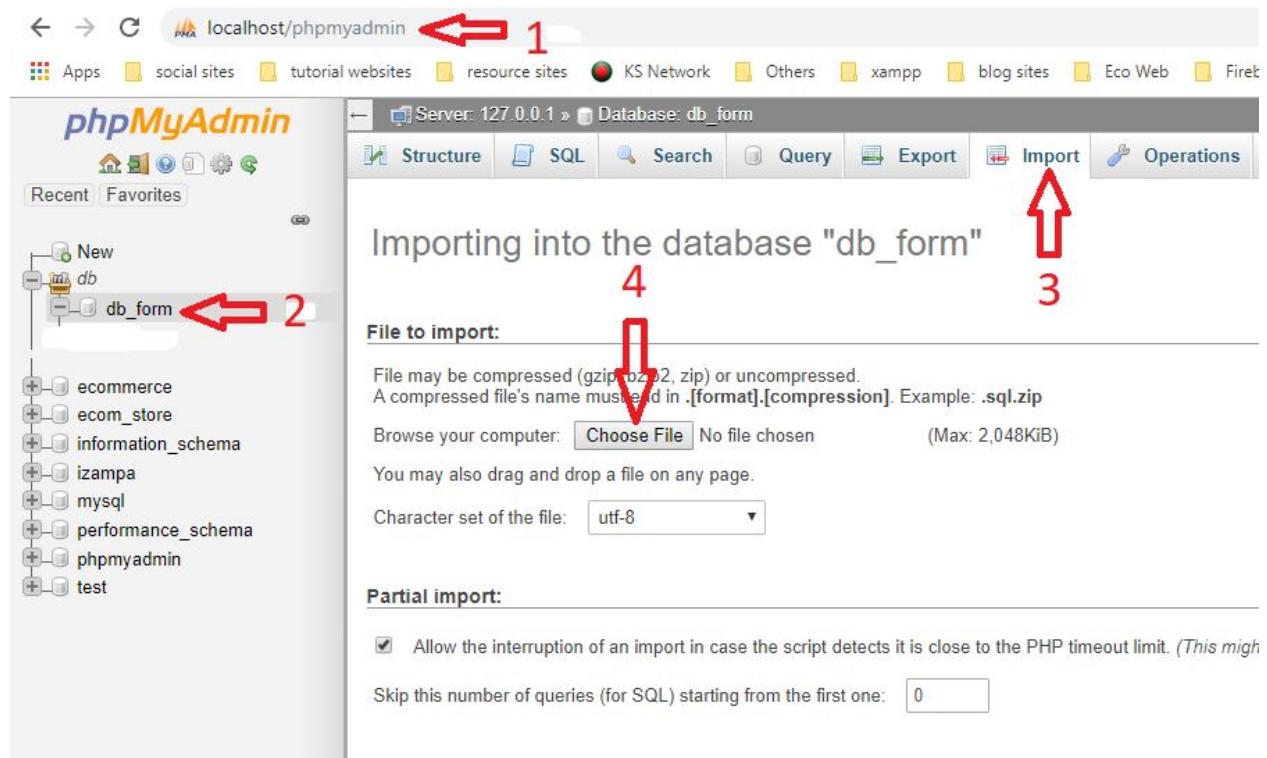

2 Start Environment

After installing XAMPP software, start “Apache” server and “MySQL” database from the software’s control panel.

3 Setup Database

From your browser, on the search-box, type “localhost/phpmyadmin”. Create a new database named “db_form”. After creating database, select the database and click “Import” tab. Select the “db_form.sql” file provided in the zip file (Instruction is given in image). Then click “Go”.

4 Put Code In The Right Place To Run

Copy the provided folder including all sub-folders and files into “xampp/htdocs/” root. In our case, the provided folder name is “report”, so the full directory will be “xampp\htdocs\report”.

5 Run The Project

From your browser, on the search-box, type “localhost/report”. This is the root of our project.

6 Submit New Form

Fill-up all the fields in order to submit a new form. After filling up all fields with provided input hints, click the submit button. If form was submitted successfully, then a message will be shown. If any error occurs, it will throw a message including errors. After submitting a form successfully, a user can not submit another form within 24 hours.

Report Form

Amount	<input type="text" value="1000"/>	
Buyer	<input type="text" value="Reza Khan"/>	
Receipt ID	<input type="text" value="ASCII"/>	
	<div>Mango X Jack Fruit X Apple X banana X comma separated items</div>	
Buyer Email	<input type="text" value="rezakhan995@gmail.com"/>	
Note	<input type="text" value="This is a list for fruits"/>	
City	<input type="text" value="Dhaka"/>	
Phone	<input type="text" value="880"/>	<input type="text" value="1689514252"/>
Entry By	<input type="text" value="1001"/>	

7 Show Report

Click the “View Report” button to see all the reports in a tabular format. There are 3 fields on the top of the report table. User can search data by typing “Buyer Name” And / Or date range as “From Date” and “To Date”. After setting the date range and / or typing buyer name, click the “Search” button to see the filtered result. If no data is provided in any search box, then clicking the “Search” button will show all data available in the database.

Report List

Search	search by buyer name	mm/dd/yyyy	mm/dd/yyyy	Form						
#	Amount	Buyer	Receipt ID	Items	E-mail	IP	Note	City	Phone	Hash
1	1000	Reza Khan	ASCII	Mango, jack Fruit,Apple,banana	rezakhan995@gmail.com	::1	This is a list for fruits	Dhaka	8801689514252	4940d8cc61c663296c839bccabd1
